1. Scope of Activity Committee  
Paul Alejado, Chairperson

a. Shermco Industries

Requests a determination on whether a contractor's license is required to perform specialty maintenance and repair on 1000 kW or larger wind turbines.

The repair work performed on the wind turbines includes electrical and mechanical maintenance, testing, adjustments, and repairs on the wind turbines. The components within the turbine package that are serviced by Shermco include but are not limited to the generator, gearbox, bi-directional converter, control systems (electrical and hydraulic), cabling systems throughout the turbine package, wind turbine blade repairs or replacements, and more which are too numerous to list. A variety of electrical and mechanical tests are performed on the components within the turbine package based on manufacturer or industry standard recommended practices. The specialty maintenance and repair services on the wind turbines does not include any construction activities, nor engineering or design activities.

b. VFC Group, LLC

Requests a determination on whether a contractor's license is required to install lightning protection systems. If a contractor's license is required, the establishment of a C-68 classification for the installation of lightning protection systems is requested.

VFC Group, LLC's ("VFC") installations are completely passive systems and are inspected by Underwriter Laboratories to ensure compliance with either UL96a or NFPA 780 (the national standards for lightning protection systems). Their typical project is a larger commercial, industrial, infrastructure or military installation. Specifications and drawings were submitted for the (1) P-033 Magazines for Long Ordnance, West Loch, JBPHH, Oahu, Hawaii project; and (2) Victoria Place, Honolulu, Hawaii project.
